## Introduction

I'm Kushal Rathod, a 3rd-year BTech CSE student and a passionate Full Stack Web Developer, with a stronger inclination towards Frontend development and technologies like React, NextJS. I love exploring ways to integrate AI and Automation into websites, making them smarter and more interactive. Currently I am working with Club Duelz as an Frontend Intern. Working with friends and teams to develop innovative ideas excites me, and I thrive in collaborative environments. I'm always eager to learn, experiment, and create something that truly stands out.

## Education

**H.B.Kapadia** *Mar 2022 – Apr 2023*
*Higher Secondary (12th)*
- Percentile: 94.48

**Ahmedabad University** *Jul 2023 – Present*
*BTech in Computer Science and Engineering (CSE)*
- GPA: 3.22/4.0

## Experience

**Frontend Intern** *Remote - Ahmedabad Sep 2025 - Present*
*Club Duelz*
- Maintaining existing websites and implementing new features.
- Writing clean, structured, and type-safe code.
- Collaborating with the team to rebuild their website from the ground up.

**Web Development Team** *Ahmedabad May 2025 - Present*
*Programming Club - AU*
- Helped develop the club's website (landing page, UI, responsiveness).
- Mentored participants in WMC (Website Making Competition), resolving queries, evaluating, and organizing.

**Web Development Intern** *Ahmedabad May 2025 - June 2025*
*Bijoi*
- Maintained and improved website by adding an **About Us** page, fixing search bugs, and correcting routing.
- Contributed ideas and gained exposure to startup environment.

## Achievements

- Secured first place in WMC 5.0 with *Los Santos Elite*, my first major web development project.
- One of the best contributors for the Winter of Codes 2024, starting my journey in the field of Open Source contributions.

## Projects

**Los Santos Elite** *github.com/Los-Santos-Elite* ↗
- Developed Los Santos Elite, a GTA-V-themed e-commerce platform in a month during WMC 5.0, enabling users to buy/sell properties and vehicles with features like Google authentication and a payment gateway, marking my first web dev victory.
- Tools Used: HTML, CSS, JavaScript, Bootstrap, NodeJS, MongoDB

**PClub Website**                                                    *github.com/PClub Website*

- Helped in creating the Programming Club's website, where I worked on responsiveness, landing and the home page, along with clean UI/UX.
- Also helped in some backend, while debugging or correcting routes when creating frontend based on the generated routes.
- Tools Used: NextJS, TailwindCSS, NodeJS, MongoDB

**InvoiceeAI**                                                       *github.com/InvoiceeAI*

- Developed InvoiceeAI, a website that is used to create and manage invoices with ease. With a clean and responsive UI, it makes the task of generating invoices easier.
- One can also use the InvoiceeZ, an AI, which can create invoices, which one can edit later, based on natural language input by the user.
- Invoices can also be converted to PDF, and can be edited any time with ease. You can also send mail regarding the invoice, to anyone, with just a click.
- Tools used: NextJS, TypeScript, NodeJS, MongoDB, Mongoose, Zustand and NextAuth, jsPDF, Nodemailer.

## Technologies

**Languages:** Python, C++, HTML, CSS, JavaScript, TypeScript

**Technologies:** ReactJS, NextJS, NodeJS, ExpressJS, Bootstrap, TailwindCSS, mySQL, MongoDB, Prisma, Redis, Mongoose, React Router, NextAuth

**Tools:** GitHub, VSCode, Excalidraw, Postman, ThunderClient, Latex, n8n
